

# RECYCLING CENTER OFFICES LOCATED IN ATHENS, TENNESSEE, USA

The Recycling Center for the city of Athens, Tennessee, USA. The Keep McMinn Beautiful group built its offices with Green Magic Homes technology, which fits perfectly with objectives of sustainability and respect for the Environment, after a public forum chose the best green technology, and Green Magic Homes was the winner.

The offices run on solar energy power and maintain a mild interior temperature all year round.

Here we see images of the structure completely covered with snow, which enhances its beauty, while the interior remains warm and pleasant.

This technology was created to be enjoyed to the fullest, to blend with the surrounding environment, which brings unique features of harmony, balance, beauty and positive energy.

Green Magic Homes offers a new way of living with Nature.
