

SHOPPING MALL IN THE DOMINICAN REPUBLIC

New proposal for an Eco-naturalist market that reflects in its architecture the freshness of products that are offered to the public, inviting green spaces that are spacious and bright providing a unique experience.

The neatness Green Magic Homes Technology offers for interiors is a big advantage for this market proposal, and reflect the green spaces in the Caribbean.

Another of the great advantages of this novel proposal is the natural freshness of its interior, because although it has open spaces, the green roofing technology absorbs heat while maintaining a fresh and clean interior.

Green Magic Homes technology, being modular, generates large spaces of any size, ideal for floor designs that require freeform interior design, maintaining an excellent lighting, ventilation and natural freshness.
